

# Development Officer Climate

## Purpose

I work in the Farms of the Future program. We aim to facilitate tech-enabled production and monitoring through improved connectivity and installation of sensor equipment. This leads to increased productivity, competitiveness, job creation and sustainable use of resources.

## A typical day in your role

My role is very varied which is the part that I really enjoy. A day could involve researching new Agtech solutions for farms, working directly and individually with farmers to implement Agtech or even presenting at Agtech training days.

## Personal attributes that are useful in this role?

- asking questions and listening
- organisation skills
- delivering results
- curiosity and passion!

## Quote

“Make the most of every opportunity and every job that comes your way. Really think about what is in the job that you enjoy? make sure that the jobs that you look at include that.”

## Education and training

Bachelor of Farm Business Management at Marcus Oldham College, Geelong  
Masters in Project Management at Southern Cross University
